**Extended Classroom Task #1**  
**Artistas Españoles**

An effective way to learn a language and appreciate its culture is through the appreciation and understanding of their art.

**Task:** In the target language, the students working in groups of 3 will develop a Power Point presentation on a Spanish Artist. This task will have a written and an oral component.

**Written component of the task:** The students will have three classes in the media center to complete this element of the task.

- In the target language, develop a Power Point presentation on a Spanish Artist, including the analysis of five samples of his/her work.

Process to complete this task:

The students will

- Choose a Spanish artist from a list given by the teacher.
- Go to the media center to conduct a research of the chosen artist using books, encyclopedias, and websites.
- In the target language, create a Power Point presentation on the artist. Include the information specified by the teacher and the analysis of five samples of the artist's work.
- In English, find relevant, interesting and clarifying information about the artist's life, style, or analysis of his/her art. This information will be included during your oral presentation.
- Develop a quiz using the information presented to the class which will be given at the end of each presentation.
- While working in this component students may use dictionaries, computers or other print resources. The presentation should last between 15-20 minutes. The students should communicate accurately and effectively by demonstrating appropriate sentence structure and language conventions, and selecting words and idioms appropriate to the content. The students should also develop the topic clearly, addressing all the required elements listed in the rubric.

**Oral component of the task:** The students will have one week outside school to complete this element of the task.

- Practice their Power Point presentation.

Process to complete this task:

The students will

- Compile all the information and work completed in the media center into one presentation.
- Practice correct intonation and pronunciation in the target language.
- Make sure they have relevant, interesting and clarifying information about the artist's life, style, or analysis of his/her art in English to accompany each slide.
- Make sure all members of the group participate equally.
